PERSONAL PROJECTS

Cryptocurrency App

Jan 2024- July 2024   Team Size - 2

Description -Developed a user-friendly cryptocurrency tracking application using Flutter. Features real-time price updates, portfolio management, and market trend analysis. Implemented API integration for live data fetching and utilized state management for efficient data handling.

Music Player App

Feb 2023 - Sept 2023   Team Size - 2

Description -Created a feature-rich music player with a sleek UI using Flutter. Incorporated functionalities such as playlist creation, equalizer settings, and background play. Implemented local storage for offline playback and integrated with system audio controls for seamless user experience.

Food Delivery App

Oct 2022 - Jan 2023   Team Size - 2

Description -Designed and developed a robust food delivery application using Flutter. Features include restaurant browsing, menu exploration, order placement, and real-time order tracking. Integrated payment gateways and implemented geolocation services for accurate delivery management.

Travelling App

June 2022 - Sept 2023   Team Size - 2

Description - Engineered a versatile travel companion app using Flutter. Incorporated features such as itinerary planning, booking services for flights and hotels, and interactive maps with points of interest. Implemented offline mode for access to essential information without internet connectivity.
